PROFILE

Women's sports, data, and technology professional with 9+ years inside the WTA and more than 20 years in technology, research, engineering, and technical leadership. Technical Leader at Cisco and founder of She's On First, an independent women's baseball media and data project documenting the WPBL's inaugural season.

WOMEN'S SPORTS & SELECTED WORK

SHE'S ON FIRST | Founder & Creator | 2026-Present

Women's baseball media, research & data • shesonfirst.com

- Built an independent platform documenting the WPBL's inaugural season through player pages, schedules, statistical leaders, original features, and a structured founding-player record.
- Research and write deeply sourced player profiles using official records, independent reporting, statistical data, and a documented factual-review and image-rights workflow.
- Developed a transparent WPBL data pipeline for schedules, player statistics, and leaderboards, including through-dates, methodology, and data-quality decisions.

WOMEN'S TENNIS ASSOCIATION (WTA) | Information Systems Coordinator | 9+ years

Professional women's tennis • Greater Tampa Bay Area • International tournament travel

- Traveled internationally with WTA staff and professional players, providing tournament statistics and data to the press corps before and during play.
- Supported information systems and data needs in a live sports environment where accuracy and speed directly affected media and event operations.

WOSOLIVE | Creator & Developer | 2025-Present

Women's sports scores, schedules & data • wosolive.com

- Built a fan-facing product that integrates, filters, normalizes, and presents women's sports scores, schedules, and competition data across leagues.

TECHNOLOGY, RESEARCH & LEADERSHIP

CISCO SYSTEMS | Security Research Engineering Technical Leader | 2017-Present

Remote

- Lead research and analysis spanning international cybersecurity standards, government requirements, product security, and emerging technologies across Cisco's router portfolio.
- Translate dense technical requirements into accurate, usable documentation for engineers, laboratories, government stakeholders, and international technical communities.
- Chair the Network Device International Technical Community, coordinating 100+ participants across industry, government, laboratories, consulting, and academia; develop AI-assisted research and assurance workflows.

CISCO SYSTEMS | Network Consulting Engineer / Test Engineer | 2014-2017

Research Triangle Park, NC

- Designed and executed complex government testing and proof-of-concept projects; analyzed results and produced technical reports, presentations, and implementation guidance.

Earlier technology experience: Network Engineer - U.S. CENTCOM / SAIC • Network Administrator - ITT Exelis, Afghanistan • Network Engineer - AT&T

EDUCATION & FOCUS

University of South Florida - B.A. • York University - A.A.
